

Multicopy

NEXT

A premium paper that supports climate action

Multicopy NEXT

All steps forward matter – even the small ones. Like choosing a printing paper that supports climate action. With Multicopy NEXT, we want to inspire you to join us in taking that extra little step.

Product benefits

Hassle-free paper

Multicopy NEXT is an easy-to-use premium paper with great runnability, ideal for all types of office machines.

Sharp results

Multicopy NEXT features ColorLok® technology, delivering vivid colors, bolder blacks, crisper text, and quick-drying inks for superior print quality. It meets the ISO 9706 standard for permanent papers.

Premium all the way

Multicopy NEXT is FSC® certified, the fibers are coming exclusively from sustainably managed forest.

Multicopy NEXT is available in A4 and A3.

Climate action projects

Multicopy NEXT supports two climate action projects: Community Reforestation in Ghana and Degraded Grassland Afforestation in Uruguay.

More information about the projects, the paper's carbon footprint, and Sylvamo GHG reduction goals is available here.

From wood to paper and beyond

Multicopy paper is made at Nymolla (Sweden). It's an integrated mill where we directly manage the pulp and paper-making process from wood to paper within the same mill. In partnership with the Nordic energy company Gasum, we convert process water residue into fossil-free fuel liquefied biogas (LBG).
